SUBJECT: Lower Sacramento Road - Traffic Request

Thank you for expressing your concerns about Lower Sacramento Road. The City of Lodi is planning on widening Lower Sacramento Road to accommodate left turn lanes at Elm Street and Part West Drive. A traffic signal with street lights and crosswalks will also be installed at Lower Sacramento Road and Elm Street.

We have initiated a request to the Federal Highway Administration for federal funding. We have tentatively scheduled construction to begin in Spring/Summer 1990. If you have any other questions, please feel free to contact Paula J. Fernandez or Richard C. Prima at 333-6706. Again, thank you for your concern.

RECEIVED

City Council and Traffic Dept.

AUG 22 1989

Last night was the second accident in one week at the corner of Parkwest Dr. and Lower Sacramento Road. Traffic that is moving at 45 miles an hour and not familiar with the road, someone to turn or pull out. I recently was nearly hit from behind while turning into Parkwest, the driver turned off into the dirt to avoid me.

I think it is time you took a good look at the traffic and speed on Lower Sacramento Rd. All we need is a turning lane, its pretty scary to wait to make a turn when cars are coming up fast behind you.

I was told before that it is too costly to put in a sign, what about the cost of a life? We see increases in water, electricity, we aren't asked if its okay, so why not add 1.00 to every city bill that is sent out and use the money for a stop sign, I'm sure no one would care or even notice.

Also, it would help if Lower Sacramento wasn't used to sell cars, trucks and boats. On a weekend it is hard to tell if a car is coming out of Parkwest because these cars are parked along the road, If they must use this area to sell cars, at least make it a rule that they must sell on the opposite side or not near an intersection.

Thank you.
